

September 1998

To install the Jam™ Byte-Code Compiler version 1.0, Jam Byte-Code Player version 1.0, and ASCII Jam Player version 1.2, perform the following steps.

1. Create a directory on your hard disk to store each file. For example, create a **jbc** directory for the Jam Byte-Code Compiler, a **jbcp** directory for the Jam Byte-Code Player, and a **jam** directory for the ASCII Jam Player.
2. Type the following commands at a DOS or command prompt:

```
Jam Byte-Code Compiler: <CD-ROM Drive>:\jam\jbc_10 \d↵  
Jam Byte-Code Player:   <CD-ROM Drive>:\jam\jbcp_10 \d↵  
ASCII Jam Player:       <CD-ROM Drive>:\jam\jam_12 \d↵
```

When prompted, specify the appropriate directory on your hard drive in which to store the files. Make sure that the **jbc_10.exe** and **jbcp_10.exe** files are stored in separate directories.

Refer to the following documents for more information on these files:
